

## 1987 INDEX

### A

- Abdomen
  - infections in diabetes, Sept. 560-561
  - trauma causing biliary injury, Jan. 54-55
  - wall, fibrosarcoma of, May 309
- Abscess
  - plantar, in diabetes, Sept. 568
  - subhepatic, and biliary stricture, benign, Jan. 56
- Adenocarcinoma (see Lung adenocarcinoma)
- Adenoma
  - extraintestinal, May 306-307
  - tubular, May 282
    - in Gardner's syndrome, May 298
  - villous, May 282
- Adriamycin
  - effect on wound breaking strength, Oct. 662
  - infiltration, ulcer after, Oct. 658
- Age: in burns, June 371
- Air embolism, Apr. 238-239
- Airway
  - established by oral route, Apr. 231
  - involvement in lung cancer, Nov. 729
  - obstruction, Apr. 229-232
- Allograft (see Burns, allograft for, cadaver)
- Allotransplantation: islet cell, in diabetes, Sept. 589
- Ampulla of Vater: carcinoma of, May 306
- Amputation: lower limb, in diabetes, Sept. 576-581
- Anastomosis
  - in biliary stricture, benign end-to-end, Jan. 29-30
  - fixation of transanastomotic tube, Jan. 35
  - incision for, Jan. 31-32
  - technique, Jan. 35-37
  - ureterocolonic, July 423
  - ureteroileal, July 414
  - ureterosigmoid, submucosal tunnels for, July 422
- Anesthesia: for carotid endarterectomy, Aug. 504-505
- Aneurysm: false, of subclavian artery, Apr. 245
- Anorectal complications: of cancer chemotherapy, Oct. 624-627
- Antibodies: monoclonal, to surface markers, Nov. 703-704
- Antigenic heterogeneity: of metastases, Mar. 163-167
- Antigens: and burns, June 379
- Antimicrobials: empiric, Apr. 228
- Antrectomy, Dec. 774
  - distal, proposed by DeMiguel, Dec. 796
  - mucosal, for gastric ulcer, Dec. 810-812
  - suprapyloric, in gastric ulcer, Dec. 807-810
- Antrum
  - mucosal stripping operation of Kirk, Dec. 811
  - with ulcer removed, Dec. 793
- Anus: inflammatory lesions in leukemia, radiotherapy of, Oct. 626
- Aorta
  - rupture, contained, Apr. 246, 248
  - tear of, Apr. 249
- Appendicitis: complicating chemotherapy of cancer, Oct. 629-631
- Arteries
  - carotid (see Carotid artery)
  - coronary, disease in diabetes, Sept. 552-553
  - femoral, atherosclerosis in diabetes, Sept. 548
  - hepatic, for infusion with implantable pump, complications of, Oct. 635-640
  - subclavian, false aneurysm of, Apr. 245

## 1987 INDEX

### A

- Abdomen
  - infections in diabetes, Sept. 560-561
  - trauma causing biliary injury, Jan. 54-55
  - wall, fibrosarcoma of, May 309
- Abscess
  - plantar, in diabetes, Sept. 568
  - subhepatic, and biliary stricture, benign, Jan. 56
- Adenocarcinoma (see Lung adenocarcinoma)
- Adenoma
  - extraintestinal, May 306-307
  - tubular, May 282
    - in Gardner's syndrome, May 298
  - villous, May 282
- Adriamycin
  - effect on wound breaking strength, Oct. 662
  - infiltration, ulcer after, Oct. 658
- Age: in burns, June 371
- Air embolism, Apr. 238-239
- Airway
  - established by oral route, Apr. 231
  - involvement in lung cancer, Nov. 729
  - obstruction, Apr. 229-232
- Allograft (see Burns, allograft for, cadaver)
- Allotransplantation: islet cell, in diabetes, Sept. 589
- Ampulla of Vater: carcinoma of, May 306
- Amputation: lower limb, in diabetes, Sept. 576-581
- Anastomosis
  - in biliary stricture, benign end-to-end, Jan. 29-30
  - fixation of transanastomotic tube, Jan. 35
  - incision for, Jan. 31-32
  - technique, Jan. 35-37
  - ureterocolonic, July 423
  - ureteroileal, July 414
  - ureterosigmoid, submucosal tunnels for, July 422
- Anesthesia: for carotid endarterectomy, Aug. 504-505
- Aneurysm: false, of subclavian artery, Apr. 245
- Anorectal complications: of cancer chemotherapy, Oct. 624-627
- Antibodies: monoclonal, to surface markers, Nov. 703-704
- Antigenic heterogeneity: of metastases, Mar. 163-167
- Antigens: and burns, June 379
- Antimicrobials: empiric, Apr. 228
- Antrectomy, Dec. 774
  - distal, proposed by DeMiguel, Dec. 796
  - mucosal, for gastric ulcer, Dec. 810-812
  - suprapyloric, in gastric ulcer, Dec. 807-810
- Antrum
  - mucosal stripping operation of Kirk, Dec. 811
  - with ulcer removed, Dec. 793
- Anus: inflammatory lesions in leukemia, radiotherapy of, Oct. 626
- Aorta
  - rupture, contained, Apr. 246, 248
  - tear of, Apr. 249
- Appendicitis: complicating chemotherapy of cancer, Oct. 629-631
- Arteries
  - carotid (see Carotid artery)
  - coronary, disease in diabetes, Sept. 552-553
  - femoral, atherosclerosis in diabetes, Sept. 548
  - hepatic, for infusion with implantable pump, complications of, Oct. 635-640
  - subclavian, false aneurysm of, Apr. 245

## Arteriography

biliary stricture, benign, Jan. 20  
in rupture of aorta, contained,  
Apr. 246

Ascites: malignant, peritoneovenous  
shunting in, and metastases,  
Mar. 190

Atherosclerosis: of femoral arteries  
in diabetes, Sept. 548

Atony: bladder, after chemotherapy  
of cancer, Oct. 646

## Atrophy

in biliary stricture, malignant,  
Feb. 79

liver, Jan. 10-12

in benign biliary stricture, Jan.  
43-44

nail, in Cronkhite-Canada syn-  
drome, May 286

Autografting: islet cell, in diabetes,  
Sept. 590

Autotransplantation: pancreatic, in  
diabetes, Sept. 589-590

## B

Bacteremia: in diabetes, Sept. 563

Baillie, Matthew, Dec. 768

Barium enema: in Gardner's syn-  
drome, May 299

Barium study: of pyloric type III  
gastric ulcer, Dec. 778

## Bile

(See also Biliary)

### duct

ischemia, Jan. 14-15

strictures (see Biliary strictures)

duct tumors, Feb. 81-115

biliary drainage procedures in,  
assessment for, Feb. 87-88

bypass, left duct, Feb. 108

chemotherapy of, Feb. 112-115  
common duct, mid- and low,  
Feb. 116-118

diagnosis, Feb. 82-84  
hilar, Feb. 81-115

intrahepatic, Feb. 81-115

intubation in, Feb. 104-108

ligamentum teres approach to,  
Feb. 109-112

mortality in, Feb. 107

palliative approaches, Feb. 103-  
115

postoperative care, Feb. 102-  
103

radiotherapy of, Feb. 112-115  
resectability, assessment of,  
Feb. 84-87

resection, Feb. 89-103

resection, local, with recon-  
struction of biliary-enteric  
continuity, Feb. 94-97

resection techniques, Feb. 93-  
94

treatment options, Feb. 88

## Biliary

(See also Bile)

cancer causing biliary obstruc-  
tion, Feb. 78

decompression, Feb. 103

drainage procedure in biliary  
duct tumor, Feb. 87-88

-enteric continuity reconstruction  
in bile duct tumors, Feb. 94-  
97

enteric repair procedures, Jan.  
30-31

fibrosis, Jan. 10

fistula, Jan. 28

after cholecystectomy, Jan. 27

injuries, Jan. 12-13

abdominal trauma causing, Jan.  
54-59

after operations other than  
cholecystectomy, Jan. 52-54

### obstruction

biliary cancer causing, Feb. 78  
pathological effects of, Jan. 10-  
12

operations, Jan. 52-53  
strictures (see below)

tree, in emphysematous chole-  
cystitis, Sept. 560

## Biliary strictures

anatomy, Jan. 7-9

variations in, Jan. 8

atrophy in, Feb. 79

benign, Jan. 7-66

anastomosis in (see Anastomo-  
sis in biliary stricture, be-  
nign)

### Biliary strictures (*cont.*)

- arteriography of, Jan. 20
- causes, Jan. 12
- causes at Hammersmith Hospital, Jan. 53
- cholangiography of, Jan. 19-21, 45
- cholelithiasis in, long-standing, Jan. 55-56
- classification, Jan. 22-24
- classification, anatomical, Jan. 23
- classification based on level of strictures related to confluence of hepatic duct, Jan. 24
- clinical presentation, Jan. 17-18
- diagnosis, Jan. 17-22
- duodenal ulcer and, Jan. 56
- after gastrectomy, Jan. 53-54
- hepaticojejunostomy in (*see* Hepaticojejunostomy)
- injuries recognized in early postoperative period, Jan. 28-29
- injuries recognized at time of operation, Jan. 25-28
- laboratory investigations, Jan. 18
- liver atrophy/hypertrophy in, Jan. 43-44
- Longmire procedure in, Jan. 39-41
- lymphadenitis and, granulomatous, Jan. 56
- management, preoperative, Jan. 24-25
- morbidity in, Jan. 47-48
- mortality in, Jan. 47-48
- mucosal graft surgery in, Jan. 37-39
- pancreatitis and, chronic, Jan. 57-58
- portal hypertension and, Jan. 44-46
- postinflammatory, Jan. 55-58
- prognostic factors in, Jan. 23
- radiography (*see* Radiography of biliary stricture, benign)
- severity, Jan. 22-24

- subhepatic abscess or inflammation in, Jan. 56
- surgical procedures, Jan. 29-51
- treatment, Jan. 25-52
- treatment, results, Jan. 46-47, 48-51
- drainage of, mortality in, Feb. 107
- malignant, Feb. 75-127
  - clinical presentation, Feb. 79-81
  - diagnosis, Feb. 79-81
  - etiology, Feb. 77-78
  - incidence, Feb. 77
  - infection in, Feb. 79
  - laboratory investigations, Feb. 81
  - location, Feb. 75-76
  - natural history, Feb. 77
  - pathology, Feb. 75-76
  - pathophysiologic effects, Feb. 78-79
  - radiography of, Feb. 81
  - management, Jan. 7-12
  - postoperative, Jan. 13
- Biological dressings: for burns, June 360-362
- Biomarkers: in lung cancer, Nov. 700-702, 703
- Bladder
  - artificial, July 433
  - atony after chemotherapy of cancer, Oct. 646
  - cecal, July 433-438
  - reservoir, colonic, pressures during filling of, July 437
- Blood
  - flow
    - cerebral (*see* Cerebral, blood flow)
    - penile, in diabetes, Sept. 555
  - monocytes (*see* Monocytes, blood)
- Bowel
  - perforation complicating chemotherapy of cancer, Oct. 619-623
  - preparation for sigmoid conduit diversion, July 419-420
  - small
    - injuries, Apr. 256

- at laparotomy in ovarian cancer, Oct. 642
- shotgun blast to, Apr. 257
- Brachyradiotherapy, Oct. 664
- Bronchus: tear of, Apr. 240
- Burns, June 347-397
  - age in, June 371
  - allograft for, cadaver, June 363-370
  - exclusions, automatic, for cadaver skin donation, June 365
  - indicators for use, June 364
  - survival after, June 367
- antigens and, B and DR HLA, June 369
- antimicrobial agents, topical, alternatives to, June 360-362
- biological dressings, June 360-362
- death after, causes, June 370
  - lung complications, June 371
- debridement
  - length of hospital stay after, June 387
  - survival and, June 367
- energy expenditure, resting, June 369
- ethical dilemma, June 386-388
- excision
  - early, length of hospital stay, June 387
  - early, mortality rate in, June 368
  - early, and survival, June 367
  - of wound, June 362-363
- hypermetabolic response to, support of, June 349-356
- hypermetabolism in (in rat), June 354
- infection control by conservative methods, June 356-360
- inhalation injury, June 370-384
  - clinical signs, June 375
  - diagnosis without bronchoscopy, June 375
  - incidence, June 371
  - mortality in, June 371, 375
  - mafenide acetate "pulse" therapy of, June 358

- management, June 347-349
  - of wound, June 356-360
- mortality (see Mortality, burns)
- oxygen consumption after (in rat), June 355
- resuscitation after, June 347-349
- of special nature, June 385
- survival
  - characteristics in children, June 366
  - debridement in, June 367
  - excision in, early, June 367
  - grafts in, June 367
  - length of hospital stay of, June 387
- total body surface area, June 372
- treatment, June 347-397
- variance analysis, June 373, 374
- wound management, June 356-360
- Bypass: in bile duct tumors, Feb. 108

## C

- Camey procedure, July 462
- Cancer
  - biliary, causing biliary obstruction, Feb. 78
  - cellular diversity in, origin of, Mar. 152-154
  - chemotherapy in (see Chemotherapy in cancer)
  - colon, syndrome, discrete polyps in, May 294-296
  - lung (see Lung cancer)
  - metastases (see Metastases)
  - ovaries, small bowel appearance at laparotomy in, Oct. 642
  - rectum, after ileoproctostomy for neoplastic polyposis, May 316
- Carcinoma
  - adenocarcinoma (see Lung adenocarcinoma)
  - of ampulla of Vater, May 306
  - cholangiocarcinoma (see Cholangiocarcinoma)

## Carcinoma (*cont.*)

- colon, resection, "no touch" surgical techniques for, Mar. 188-189
- colorectal
  - blood monocyte activation and, Mar. 181-182
  - metastatic behavior of cells in, Mar. 174-175
  - kidney, renal cell, studies, Mar. 175-177
  - lung (*see* Lung carcinoma)
  - periampullary, May 303-306
  - renal cell, studies, Mar. 175-177
- Carotid artery clamping
  - EEG changes during, histogram display of, Aug. 516
  - unilateral global suppression after, Aug. 512-513
- Carotid artery occlusion
  - EEG changes during, histogram display, Aug. 512
  - EEG power reduction in patients with EEG changes after, Aug. 514
- Carotid artery unclamping: EEG activity after, histogram display, Aug. 515
- Carotid backpressure measurement, Aug. 494-496
- Carotid endarterectomy, Aug. 481-532
  - anesthesia in, Aug. 504-505
  - cerebral artery blood velocity changes during, Aug. 500
  - electroencephalography during, Aug. 500-519
  - evoked potentials and, Aug. 500-519
  - monitoring during (*see* Monitoring, intraoperative during carotid endarterectomy)
  - morbidity of, Aug. 482-485
  - mortality of, Aug. 482-485
  - results, current, Aug. 483
- Carotid occlusion
  - EEG from, Aug. 497
  - risk of cerebral ischemia after, Aug. 511

## Catheter

- central venous (*see* Central venous catheter)
- effect of catheter exchange on catheter removal for suspected sepsis, Oct. 655
- second, and chemotherapy, Oct. 663-667
- Cecal bladder, July 433-438
- Cells (*see* Tumor, cells)
- Central venous catheter, Oct. 653
  - exchange over a guide wire, Oct. 655
  - infectious complications, Oct. 654
  - removal of, reasons for, Oct. 654
- Cerebral
  - artery blood velocity changes during carotid endarterectomy, Aug. 200
  - blood flow, Aug. 485-491
    - by anesthetic used, Aug. 498
    - measurement by Doppler ultrasound, Aug. 499-500
    - measurement by EEG, indirect, Aug. 505-506
    - measurement, intraoperative, Aug. 497-500
    - regulation, mechanisms involved, Aug. 486-487
    - relationship to function and ischemic injury, Aug. 485-491
    - risk grade and, Aug. 498
  - blood pressure measurement, radioactive agents for, Aug. 497-499
  - infarction, cerebral basis, Aug. 487-491
  - ischemia
    - cellular basis for, Aug. 487-491
    - degree of, duration of and recovery of electrical activity, Aug. 490
    - relationship to blood flow and function, Aug. 485-491
    - risk after carotid occlusion, Aug. 511
    - protection, Aug. 491-492
  - vascular disease in diabetes, Sept. 553-554

- Charcot's osteoarthropathy: in diabetes, Sept. 571
- Chemoradiotherapy: and wound healing, Oct. 659-663
- Chemoresponsivity testing: in lung cancer, Nov. 702-703
- Chemotherapy  
   of bile duct tumors, Feb. 112-115  
   in cancer (*see below*)  
   in lung cancer (*see under* Lung cancer)  
   tumor cell heterogeneity and, Mar. 160-163
- Chemotherapy in cancer, Oct. 613-675  
   appendicitis and, Oct. 629-631  
   bladder atony and, Oct. 646  
   bowel perforation in, Oct. 619-623  
   complications  
     anorectal, Oct. 624-627  
     gastrointestinal, Oct. 614-643  
     genitourinary tract, Oct. 643-647  
     from hepatic artery infusion with implantable pump, Oct. 635-640  
     lung, Oct. 647-651  
     surgical, Oct. 613-675  
   cystitis and, Oct. 643-645  
   enteropathy and, neutropenic, Oct. 633-634  
   gastrointestinal bleeding in, Oct. 615-619  
   gastrointestinal tract perforations secondary to, Oct. 621  
   ileus in, paralytic, Oct. 623-624  
   infiltrations, local complications, Oct. 655-657  
   intraperitoneal, Oct. 640-643  
   pancreatic toxicity in, Oct. 627-629  
   recurrent cancer after, Oct. 645-646  
   renal toxicity and, Oct. 646-647  
   second cancers and, Oct. 663-667  
   typhilitis and, Oct. 632-633  
   venous access, Oct. 651-655  
     available access alternatives, Oct. 651-652  
     long-term, complications of, Oct. 652-655
- Chest  
   flail, Apr. 232-234  
   trauma, severe, Apr. 240  
   wall invasion in lung cancer, Nov. 726-727
- Children: burns, characteristics of survivors, June 366
- Cholangiocarcinoma  
   CT of, Jan. 11  
   hilar  
     cholangiography of, Feb. 90  
     excision, and portal vein bifurcation, Feb. 102  
     hepatectomy in, Feb. 105  
     hepaticojejunostomy in, Feb. 114  
     resection including hepatic resection, Feb. 97-101  
     with stenosis of portal vein, Feb. 86  
     ultrasound of, Feb. 82  
   papillary, in lower bile duct, Feb. 76  
   quality of life after resection or bypass, Feb. 92
- Cholangiography  
   of biliary stricture, benign, Jan. 21, 45  
   complex, Jan. 19  
   in cholangiocarcinoma  
     hilar, Feb. 90  
     papillary, Feb. 76  
   after hepatic artery infusion, Oct. 636
- Cholangitis, sclerosing  
   ERCP in, Feb. 84  
   after hepatic artery infusion, Oct. 635-637
- Cholecystectomy: biliary fistula after, Jan. 27
- Cholecystectomy, injuries, Jan. 13-17  
   anatomical variations, Jan. 13-14  
   causative factors, Jan. 13  
   hemorrhage, Jan. 14  
   prevention of, Jan. 13  
   technical factors in, Jan. 15-17

**Cholecystitis:** acute and emphysematous, in diabetes, Sept. 559-560

**Chung method:** for high lying gastric ulcer, Dec. 820

**Colitis:** ulcerative, pseudopolyp of, May 278

**Colon**

- cancer syndrome, discrete polyps in, May 294-296
- carcinoma, resection, "no touch" surgical techniques for, Mar. 188-189
- injuries, Apr. 257-258
- polyps, May 296-303
- small intestine involvement in, May 300-302
- transverse, for urinary diversion, July 424-425

**Colorectal** (*see* Carcinoma, colorectal)

**Computed** (*see* Tomography, computed)

**Conduit**

- ileal (*see* Ileal conduit)
- pressure tracings in, comparison of open and occluded, July 430
- sigmoid (*see* Sigmoid conduit)

**Continent urinary diversion,** July 431

**Coronary artery disease:** in diabetes, Sept. 552-553

**Cost-effectiveness:** of EEG monitoring, Aug. 517-518

**Cowden's syndrome,** May 289-290

**Cricothyroidotomy,** Apr. 232

**Cronkhite-Canada syndrome**

- hamartomatous polyps of ileum in, May 287
- nail atrophy in, May 286

**Cruveilhier ulcer,** Dec. 769

**Csendes method:** for high lying gastric ulcer, Dec. 821

**Cyst(s):** epidermal inclusion, of leg, May 308

**Cystitis:** after chemotherapy of cancer, Oct. 643-645

**Cytoxan,** Oct. 645

## D

**Death** (*see* Mortality)

**Deloyers proximal gastrectomy,** Dec. 822

**Desmoid** (*see* Tumors, desmoid)

**Diabetes mellitus,** Sept. 541-603

- atherosclerosis of femoral arteries in, Sept. 548
- bacteremia in, Sept. 563
- cardiovascular complications of, Sept. 546-555
- cerebrovascular disease in, Sept. 553-554
- cholecystitis in, acute and emphysematous, Sept. 559-560
- complications of, prevention of, Sept. 593-594
- coronary artery disease in, Sept. 552-553
- extremity amputations in, lower, Sept. 576-581
- foot disorders in, Sept. 564-581
- needle embedded in sole of foot, Sept. 568
- soft-tissue infection, with gas bubbles in tissues, Sept. 575
- hemodialysis in, vascular access for, Sept. 554-555
- infections in, Sept. 555-564
- fungal, Sept. 562-563
- intra-abdominal, Sept. 560-561
- prevention, Sept. 564
- skin, Sept. 556-559
- soft-tissue, Sept. 556-559
- treatment, Sept. 564
- urinary tract, Sept. 561-562

**insulin administration** (*see* Insulin administration)

**ketoacidosis** of, emergency surgery in, Sept. 546

**management, problems in,** Sept. 541-542

**peripheral vascular disease** complicating, Sept. 547-552

**pneumonia in,** Sept. 563-564

**surgery in,** Sept. 541-603

- emergency, in ketoacidosis, Sept. 546

major elective operations, Sept. 544-545  
 management during operation, Sept. 544-546  
 minor surgery, Sept. 544  
 risks of, Sept. 542-544  
 surgically correctable, Sept. 581-582  
 surgically induced, Sept. 582-583  
 transplantation, Sept. 583-590  
   islet cell allotransplantation, Sept. 589  
   islet cell autografting, Sept. 590  
   pancreatic, Sept. 585-589  
   pancreatic autotransplantation, Sept. 589-590  
   renal, Sept. 583-585  
 Diaphragm  
   injuries of, Apr. 247-249  
   rupture, Apr. 252  
 Diathermy: in biliary stricture, benign, Jan. 32  
 Doppler ultrasound: in cerebral blood flow measurement, Aug. 499-500  
 Dressings: biological, for burns, June 360-362  
 Duncan's multiple range test, June 373, 374  
 Duodenal polyps: in Gardner's syndrome, May 305  
 Duodenal ulcer: and biliary stricture, benign, Jan. 56

## E

Electrical activity: recovery after ischemia, Aug. 490  
 Electroencephalography  
   during carotid endarterectomy, Aug. 500-519  
   from carotid occlusion, Aug. 497  
   in cerebral blood flow measurement, indirect, Aug. 505-506  
   changes, with late development, necessitating shunt, Aug. 522  
   changes reflecting malfunctioning of shunt, Aug. 521  
   during hypotension, Aug. 517  
   intraoperative use, Aug. 506-517  
   monitoring, cost-effectiveness of, Aug. 517-518  
   physiologic basis, Aug. 500-502  
   spectral array display, compressed, Aug. 508-511, 512-513  
   technical considerations with, Aug. 500-502  
 Electron microscopy: in lung cancer diagnosis, Nov. 696-699  
 Embolism: air, Apr. 238-239  
 Embolus: multicell, and metastases, Mar. 145  
 Emphysematous cholecystitis  
   biliary tree and gallbladder in, Sept. 560  
   in diabetes, Sept. 559-560  
 Endarterectomy (see Carotid endarterectomy)  
 Enema: barium, in Gardner's syndrome, May 299  
 Enostosis: maxillary, in Gardner's syndrome, May 312  
 Enteropathy: neutropenic, in chemotherapy of cancer, Oct. 633-634  
 ERCP: in sclerosing cholangitis, Feb. 84  
 Esophagus  
   hiatal hernia, chronic gastric ulcer in, Dec. 824  
   injuries, Apr. 243  
 Evoked potentials  
   during carotid endarterectomy, Aug. 500-519  
   discussion of, Aug. 502-504  
   intraoperative use, Aug. 506-517  
 Exostosis: tibial, in Gardner's syndrome, May 311

## F

Face: gunshot wound of, Apr. 230  
 Femoral arteries: atherosclerosis in diabetes, Sept. 548  
 Fibrosarcoma  
   of abdominal wall, May 309  
   of mesentery, May 309

## Fibrosis

- biliary, Jan. 10
- retroperitoneal, May 309
- Fistula, biliary, Jan. 28
- after cholecystectomy, Jan. 27
- Flail chest, Apr. 232-234
- Foot (see Diabetes mellitus, foot disorders in)
- "Form and Function operation:" of Holle, for type I gastric ulcer, Dec. 815
- Fracture (see Pelvic fracture)
- Fungal infections: in diabetes, Sept. 562-563

## G

- Gallbladder: in emphysematous cholecystitis, Sept. 560
- Ganglioneuromatosis: mucosal, May 290
- Gardner's syndrome, May 296-303
  - adenoma in, tubular, May 298
  - adenomatous change in mucosa in, May 300
  - associated nonneoplastic disease in families with, May 313
  - barium enema in, May 299
  - data on patients with, May 296
  - death cause in, May 314
  - duodenal polyps in, May 305
  - fibrous tumors in, May 309
  - gastric polyposis in, diffuse, May 303
  - lymphoid aggregate in terminal ileum in, May 302
  - maxillary enostosis in, May 312
  - neoplastic diseases in families with, May 314
  - rectal polyps in, May 297
  - tibial exostosis in, May 311
- Gastrectomy
  - biliary stricture after, Jan. 53-54
  - Deloyers proximal, Dec. 822
  - pylorus sparing, in gastric ulcer, Dec. 807-810
  - segmental, for gastric ulcer, Dec. 812-815
- Gastric polyposis, May 302-303
- Gastric resection: distal, with or without vagotomy, Dec. 791-799
- Gastric ulcer, Dec. 767-845
  - adherence to pancreas, Dec. 780
  - benign
    - classification of H. Daintree Johnson, Dec. 755
    - type I, radiography of, Dec. 776
  - case review, Dec. 798
  - chronic, in esophageal hiatal hernia, Dec. 824
  - classification, Dec. 773-777
  - complications, Dec. 829-832
  - diagnosis, Dec. 786-787
  - etiology, Dec. 772
  - giant, Dec. 825-828
  - hemorrhage complicating, Dec. 829-830
  - high lying, Dec. 816-825
    - Chung method for, Dec. 820
    - Csendes method, Dec. 821
    - Pauchet method of management, Dec. 818
  - histopathology, Dec. 779-781
  - historical aspects, Dec. 767-771
  - incidence, Dec. 771-772
  - likely sequence of events leading to development of, Dec. 785
  - location of, Dec. 777-779
    - anatomic, Dec. 779
  - malignant changes of, Dec. 781
  - management, medical, Dec. 787-789
  - obstruction complicating, Dec. 831-832
  - parietal cell and, Dec. 805
  - pathogenesis, Dec. 781-785
  - perforation complicating, Dec. 830-831
  - resection, segmental, various types performed over the years, Dec. 814
  - signs and symptoms, presenting, Dec. 797
  - surgery for, Dec. 791-815
    - indications for, Dec. 789-791
    - type I, antrectomy for, distal, Dec. 796
    - type II, radiography of, Dec. 777

type III  
 pyloric, barium study of, Dec. 778  
 pyloric channel, Dec. 792  
 Gastric vagotomy  
 proximal, for gastric ulcer, Dec. 801-807  
 selective, with pyloroplasty for gastric ulcer, Dec. 799-801  
 Gastrointestinal  
 bleeding in cancer chemotherapy, Oct. 615-619  
 complications of chemotherapy of cancer, Oct. 614-643  
 polyposis (*see* Polyposis, gastrointestinal)  
 tract perforation complicating chemotherapy, Oct. 621  
 Genitalia: trauma to, Apr. 258-259  
 Genitourinary tract complications: of cancer chemotherapy, Oct. 643-647  
 Gilchrist procedure, July 433  
 Graft  
 allograft in burns (*see* Burns, allograft in)  
 mucosal, for surgery in benign biliary stricture, Jan. 37-39  
 Gunshot wounds, Apr. 245  
 face, Apr. 230

## H

Hallux valgus: and neuropathy in diabetes, Sept. 567  
 Hamartoma, May 277-280  
 Healing: wound, and chemoradiotherapy, Oct. 659-663  
 Heart  
 complications in diabetes, Sept. 546-555  
 injuries, Apr. 237-238  
 Heel: neuropathic ulcer of, Sept. 569  
 Hematogenous-lymphatic spread: of metastases, Mar. 141  
 Hemodialysis: vascular access in diabetes, Sept. 554-555  
 Hemorrhage  
 after cholecystectomy, Jan. 14  
 gastric ulcer complicated by, Dec. 829-830

gastrointestinal in cancer chemotherapy, Oct. 615-619  
 Hemothorax: massive, Apr. 236  
 Hendren's technique: of intussusception, July 436  
 Hepatectomy: in hilar cholangiocarcinoma, Feb. 105  
 Hepatic artery: infusion with implantable pump, complications of, Oct. 635-640  
 Hepaticojejunostomy, Jan. 32-35  
 initial steps, Jan. 37  
 right-sided intrahepatic, Jan. 42-43  
 segment II, Jan. 42  
 segment III, Jan. 42  
 in cholangiocarcinoma, hilar, Feb. 114  
 Hernia: esophageal hiatal, chronic gastric ulcer in, Dec. 824  
 Hilar plate: lowering, Jan. 34  
 Holle's "Form and Function operation:" for type I gastric ulcer, Dec. 815  
 Hypermetabolism: in burns (in rat), June 354  
 Hyperplasia: of rectum, nodular lymphoid, May 279  
 Hyperplastic polyps, May 277  
 unclassified, May 275-276  
 Hypertension: portal, and benign biliary stricture, Jan. 44-46  
 Hypertrophy: of liver in benign biliary stricture, Jan. 43-44  
 Hypotension: EEG changes during, Aug. 517

## I

Ileal conduit diversion, July 407-418  
 operative technique, July 411-415  
 preparation of patient, July 408-411  
 stoma, preparation of, July 415-418  
 Ileal loop diversion  
 Bricker's method for, July 408  
 Leadbetter's technique for, July 409  
 stoma, correct placement, July 410

- Ileal nipple valve: intussuscepted, July 435
- Ileal reservoir, July 438-464  
alternatives in reservoir construction, July 457-459  
formation of, July 444-451  
operative technique, July 442-455  
patient selection for, July 438-442  
postoperative complications, July 456-457  
preoperative preparation, July 442  
pressures during filling, July 439-440  
results, July 455-456
- Ileocecal diversion, July 426-427  
cutaneous, July 424
- Ileoproctostomy for polyposis coli, follow-up, May 318  
neoplastic, rectal cancer after, May 316
- Ileostomy: ureterocecocutaneous, July 433-438
- Ileum  
hamartomatous polyps of, in Cronkhite-Canada syndrome, May 287  
suitable segment selection in ileal loop diversion, July 412-413
- Ileus: paralytic, complicating chemotherapy of cancer, Oct. 623-624
- Immunogenic heterogeneity: of metastases, Mar. 163-167
- Immunomodulators, liposome containing to activate macrophages, Mar. 179-181  
in melanoma metastases (in mice), Mar. 183-184
- Immunoperoxidase staining: in lung cancer diagnosis, Nov. 696-699
- Immunotherapy: in lung cancer, Nov. 739-740
- Implantable pump  
for hepatic artery infusion, complications of, Oct. 635-640  
for insulin administration, Sept. 592-593
- Inclusion cysts: of leg, May 308
- Infarction: cerebral, cellular basis of, Aug. 487-491
- Inhalation injury (see Burns, inhalation injury)
- Insulin administration, Sept. 591-593  
pumps for, Sept. 591-593  
implantable, Sept. 592-593  
portable, Sept. 591-592
- Intestine  
(See also Gastrointestinal)  
polyposis, syndromes of, May 275-340  
polyps, benign, histologic classification, May 276  
small, involvement in colon polyps, May 300-302  
ureterointestinal diversion, complications of, July 425-431
- Intraoperative (see Monitoring, intraoperative)
- Intubation  
in bile duct tumors, Feb. 104-108  
nasotracheal, attempted, Apr. 231
- Intussuscepted ileal nipple valve, July 435
- Intussusception: Hendren's technique for, July 436
- Ischemia  
bile duct, Jan. 14-15  
cerebral (see Cerebral, ischemia)
- Islet cell allotransplantation: in diabetes, Sept. 589
- Islet cell autografting: in diabetes, Sept. 590

## J

- Jejunum: in biliary stricture surgery, benign, Jan. 38
- Johnson, H. Daintree, Dec. 774

## K

- Kelling/Madlener operation: modification of, Dec. 817
- Ketoacidosis: diabetic, emergency surgery in, Sept. 546
- Kidney  
injury, CT of, Apr. 260

toxicity and chemotherapy of cancer, Oct. 646-647  
 transplant in diabetes, Sept. 583-585  
 Kirk antral mucosal stripping operation, Dec. 811  
 Kock pouch (see Ileal reservoir)

## L

Lasers (see Lung cancer, lasers for)  
 Leadbetter's technique: for ileal loop diversion, July 409  
 Leg: epidermal inclusion cysts of, May 308  
 Leukemia: perianal inflammatory lesions in, radiotherapy of, Oct. 626  
 Ligament: round, for approach to bile duct tumors, Feb. 109-112  
 Ligamentum teres approach: to bile duct tumors, Feb. 109-112  
 Liposome  
   -activated blood monocytes, Mar. 180, 182  
   containing immunomodulators to activate macrophages, Mar. 179-181  
   for melanoma metastases (in mice), 183-184  
 Liver  
   anatomy, segmental, Jan. 9  
   atrophy, Jan. 10-12  
     benign biliary stricture and, Jan. 43-44  
   bridge of tissue at umbilical fissure base in bile duct tumor resection, Feb. 95  
   hilus, exposure of structures, Feb. 94  
   hypertrophy in benign biliary stricture, Jan. 43-44  
   injuries of, Apr. 252-254  
   intraparenchymal injury, CT of, Apr. 253  
   resection  
     in bile duct tumors, Feb. 97-101

    with excision of bifurcation of portal vein, Feb. 101-103  
 Lobectomy: right hepatic, Feb. 104  
 Longmire procedure: in jejunal stricture, Jan. 39-41  
 Lung adenocarcinoma  
   bronchioloalveolar subtype, Nov. 693-694  
   moderately differentiated, Nov. 693  
   mucus lake, Nov. 697  
   pathology, Nov. 692-694  
 Lung cancer, Nov. 687-758  
   airway involvement in, Nov. 729  
   biology of, Nov. 699-704  
   biomarkers in, Nov. 700-702, 703  
   chemosensitivity testing in, Nov. 702-703  
   chest wall invasion in, Nov. 726-727  
   classification of WHO, 689  
   diagnosis  
     electron microscopy in, Nov. 696-699  
     immunoperoxidase staining, Nov. 696-699  
   diagnostic evaluation, Nov. 708-721  
   endobronchial lesion, obstruction of, palliation of, Nov. 741-742  
   immunotherapy in, Nov. 739-740  
   incidence data  
     Johns Hopkins University, Nov. 706  
     Mayo Clinic, Nov. 706  
     Memorial Sloan-Kettering Cancer Center, Nov. 707-708  
   lasers for, Nov. 740-744  
     laser systems, Nov. 742-744  
     technique, Nov. 742-744  
   lymph node mapping, Nov. 719-721  
   M<sub>1</sub> disease and, Nov. 730  
   mediastinal invasion in, Nov. 728-729  
   mediastinal node assessment, preoperative, Nov. 716-718  
   mixed type, unifying hypothesis for, Nov. 701

**Lung cancer (cont.)**

- monoclonal antibodies to surface markers in, Nov. 703-704
- $N_2$  tumors and, Nov. 730
- non-small-cell
  - chemotherapy of, Nov. 733-734
  - combination radiotherapy, chemotherapy and surgery, Nov. 734-736
  - radiotherapy, Nov. 731-733
  - radiotherapy, curative, Nov. 731
  - radiotherapy, palliative, Nov. 733
  - radiotherapy, postoperative adjuvant, Nov. 732-733
  - radiotherapy, preoperative adjuvant, Nov. 731-732
  - surgery of, Nov. 722-730
- occupational factors contributing to development of, Nov. 688
- oncogenes in, Nov. 700
- Pancoast tumors and, Nov. 727-728
- pathology, Nov. 688-699
- prevalence data results, Nov. 705-706
- resection
  - lower lobe sleeve, Nov. 726
  - segmental, types of, Nov. 722-723
  - upper lobe sleeve, Nov. 724-725
- results, end, American Joint Committee on Cancer, Nov. 709, 710, 714
- screening for, Nov. 704-708
- small-cell
  - chemotherapy of, Nov. 737-738
  - radiotherapy, Nov. 738
  - surgery of, Nov. 738-739
  - treatment, Nov. 736-737
- staging, Nov. 708-721
  - American Joint Committee on Cancer, Nov. 709, 710, 714
  - International System, Nov. 714
  - New International System, Nov. 712, 713
  - surgeon's approach, Nov. 687-758
- survival, Nov. 727, 729

treatment, Nov. 722-740

- Lung carcinoma
  - adenosquamous, pathology, Nov. 695-696
  - early localized
    - diagnosis, Nov. 740-741
    - treatment, Nov. 740-741
  - large-cell
    - pathology, Nov. 694-695
    - undifferentiated cells, Nov. 699
  - oat cell type, Nov. 691
  - small-cell
    - cell size, Nov. 691
    - neurosecretory granules, Nov. 698
    - pathology, Nov. 691-692
  - squamous cell
    - moderately differentiated, Nov. 690
    - pathology, Nov. 690-691
- Lung complications
  - in burns, June 371
  - in chemotherapy of cancer, Oct. 647-651
    - clinical features, Oct. 650
    - diagnoses, pathologic and microbiologic, Oct. 650
    - laboratory findings, Oct. 649
- Lung contusion, Apr. 240, 241-243
- CT of, Apr. 241, 242
- Lymph nodes
  - barrier function in metastases, Mar. 142-144
  - dissection for micrometastases, Mar. 184-185
  - mapping, Nov. 719-721
  - pulmonary nodes, regional, map of, Nov. 720
  - sites of, Nov. 717
  - stations, regional, definitions of, Nov. 721
- Lymphadenitis: granulomatous, and benign biliary stricture, Jan. 56
- Lymphatic-hematogenous spread: of metastases, Mar. 141
- Lymphatic spread: of metastases, Mar. 141-142

## M

- M*<sub>1</sub> disease: and lung cancer, Nov. 730
- Macrophage  
 activation by liposomes containing immunomodulators, Mar. 179-181  
 antimicrobial properties, activation of, Mar. 178-179  
 antitumor properties, activation of, Mar. 178-179  
 physiological role, Mar. 177-178  
 systemically activated, in treatment of micrometastases, Mar. 177-184
- Mafenide acetate "pulse" therapy: of burns, June 358
- MAINZ pouch, July 458
- Maki, T., Dec. 808
- Malignancy (*see* Cancer)
- Mal perforans ulcer: in diabetes, Sept. 567
- Maxillary enostosis: in Gardner's syndrome, May 312
- Mediastinal  
 invasion in lung cancer, Nov. 728-729  
 node assessment: preoperative, Nov. 716-718
- Mediastinoscopy: major anatomical structures identified at, Nov. 718
- Melanoma  
 allogeneic, Mar. 180  
 growth, intravascular (in mice), Mar. 147  
 metastases (*see* Metastases, melanoma)  
 variants with increased metastases, successive selection of, Mar. 149
- Mesentery: fibrosarcoma of, May 309
- Metastases, Mar. 137-209  
 in ascites, malignant, after portovenous shunting, Mar. 190  
 biology of, Mar. 137-209  
 nude mice to study, Mar. 171-177  
 cells  
   biologic behavior of, host microenvironment in, Mar. 170-171  
   selection for, *in vitro*, Mar. 150  
 in colorectal carcinoma, Mar. 174-175  
 embolus in, multicell, Mar. 145  
 excising to prevent further dissemination, Mar. 189-190  
 formation of, Mar. 138  
 heterogeneity  
   antigenic, Mar. 163-167  
   biologic, Mar. 146-159  
   biologic, challenge of, Mar. 159-167  
   biologic, origin of, Mar. 156-157  
   experiment in, design of, Mar. 151  
   immunogenic, Mar. 163-167  
   intralesional, development of, Mar. 157-159  
   of tumor cells in primary neoplasms, Mar. 148-152  
 heterogeneous tumor populations, instability of, Mar. 154-156  
 host organ environment in, Mar. 169-170  
 invasion, Mar. 138-141  
 lymph nodes in, barrier function of, Mar. 142-144  
 of melanoma  
   design of experiment demonstrating, Mar. 158  
   liposome containing, immunomodulators for (in mice), Mar. 183-184  
 metastatic behavior of tumor cells, Mar. 174-175  
 micrometastases  
   lymph node dissection in, Mar. 184-186  
   systemically activated macrophages, Mar. 177-184

## Metastases (cont.)

- microscopic, risk determination in surgical patients, Mar. 187-188
- pathogenesis, Mar. 138-146
- patterns of, Mar. 167-171
- propensity of human tumor cells (in nude mice), Mar. 173-174
- resection, selection of patients for, Mar. 186-187
- selection of variant cells with increased properties for metastases, Mar. 149
- spread
  - hematogenous, Mar. 144-146
  - lymphatic, Mar. 141-142
  - lymphatic-hematogenous, Mar. 141
- surgery of
  - practical considerations in, Mar. 184-190
  - "urgent," is there a justification for? Mar. 186
  - therapy of, nude mice to study, Mar. 171-177
- Micrometastases (see Metastases, micrometastases)
- Microscopy: electron, in lung cancer diagnosis, Nov. 696-699
- Monitoring: EEG, cost-effectiveness of, Aug. 517-518
- Monitoring, intraoperative, during carotid endarterectomy, Aug. 481-532
  - carotid backpressure measurement, Aug. 494-496
  - developing techniques, Aug. 518-519
  - direct observation, Aug. 492-494
  - neurologic, Aug. 492-519
  - "stump pressure" measurement, Aug. 494-496
- Monitoring, intraoperative: clinical integration of, Aug. 519-523
- Monitoring, intraoperative: rationale for, Aug. 482
- Monoclonal antibodies: to surface markers in lung cancer, Nov. 703-704

## Monocytes

- blood
    - activation in colorectal carcinoma, Mar. 181-182
    - liposome-activated, Mar. 180, 182
    - tumorcidal, interaction with heterogenous neoplasms, Mar. 181
  - Morbidity
    - of carotid endarterectomy, Aug. 482-485
    - operative, in benign biliary stricture, Jan. 47-48
  - Mortality
    - in bile duct tumors, Feb. 107
    - in burns
      - causes of death, June 370
      - after early excision, June 368
      - inhalation injury and, June 371, 375
      - inhalation injury causing, June 371
      - study of, June 386
    - of carotid endarterectomy, Aug. 482-485
    - cause in Gardner's syndrome, May 314
    - operative, in biliary stricture, benign, Jan. 47-48
  - Motor vehicle accidents: torso injury in, incidence, Apr. 220
  - Mucosal antrectomy: for gastric ulcer, Dec. 810-812
  - Mucosal ganglioneuromatosis, May 290
  - Mucosal graft surgery: in benign biliary strictures, Jan. 37-39
  - Myocardium: contusion, Apr. 243-244
- N**
- N<sub>2</sub> tumors: and lung cancer, Nov. 730
  - Nail atrophy: in Cronkhite-Canada syndrome, May 286
  - Nasotracheal intubation: attempted, Apr. 231
  - Neoplasms (see Tumors)

Neoplastic polyposis (see Polyposis, neoplastic)

Neoplastic polyps, May 280-283

Neuropathy: in diabetes complicated by hallux valgus and ulcer, Sept. 567

Neutropenic enteropathy: complicating chemotherapy of cancer, Oct. 633-634

"Nipple"

intussuscepted ileal nipple valve, July 435

protruding, in stoma construction, July 417

Norman Tanner Rotation Maneuver, Dec. 819

## O

Oncogenes: in lung cancer, Nov. 700

Organs: "apparent weight," in violent impact, Apr. 220

Osteoarthropathy: Charcot's, in diabetes, Sept. 571

Ovarian cancer: small bowel appearance at laparotomy in, Oct. 642

Oxygen consumption: after burns (in rat), June 355

## P

Pancoast tumors

lung cancer and, Nov. 727-728

survival data in, Nov. 728

Pancreas

autotransplantation in diabetes, Sept. 589-590

CT showing cavity near head of, Oct. 629

gastric ulcer adherent to, Dec. 780

injuries of, Apr. 254-256

toxicity and chemotherapy of cancer, Oct. 627-629

transplantation in diabetes, Sept. 585-589

Pancreatitis: and benign biliary stricture, Jan. 57-58

Paralytic ileus: complicating chemotherapy of cancer, Oct. 623-624

Parietal cell: and gastric ulcer, Dec. 805

Pelvic fracture, Apr. 261-263

classification, Apr. 261

management, Apr. 262

Pelvic injuries: compound, Apr. 263

Penile blood flow: in diabetes, Sept. 555

Periampullary carcinoma, May 303-306

Peritoneovenous shunting: for malignant ascites, and metastases, Mar. 190

Peutz-Jeghers syndrome, May 288-289

Plantar abscess: in diabetes, Sept. 568

Pneumonia: in diabetes, Sept. 563-564

Pneumothorax

closed, Apr. 234-236

open, Apr. 227-229

tension, Apr. 234-236

Polyp(s)

colon, May 296-303

small intestine involvement in, May 300-302

discrete, in colon cancer syndrome, May 294-296

duodenal, in Gardner's syndrome, May 305

hamartomatous, of ileum in Cronkhite-Canada syndrome, May 287

hyperplastic, May 277

unclassified, May 275-276

intestinal, benign, histologic classification, May 276

juvenile, May 280

neoplastic, May 280-283

rectal, in Gardner's syndrome, May 297

retention, May 280

types of, May 275

Polyposis, May 275-340

bony tumors and, May 310-312

## **Polyposis (cont.)**

- coli, May 306
    - birth incidence, May 293
    - ileoproctostomy for, follow-up, May 318
  - familial, May 296-303
  - gastric, May 302-303
  - gastrointestinal
    - classification, May 284
    - syndromes, May 283-284
  - hamartomatous, May 287-288
  - hereditary, May 287-315
  - inflammatory, May 276-277
  - intestinal, syndromes of, May 275-340
    - juvenile, May 287-288
  - neoplastic, May 290-294
    - distribution, May 293
    - historical review, May 290-292
    - ileoproctostomy for, rectal cancer after, May 316
    - incidence, May 292-293
    - inheritance, May 293-294
  - nonhereditary, May 284-287
  - perspective, May 328-329
  - research, May 324-328
  - soft tissue tumors, May 307-310
  - treatment, May 315-321
    - nonoperative, May 322
- Portal hypertension: and biliary stricture, Jan. 44-46
- Portal vein
  - bifurcation excision, with liver resection, Feb. 101-103
  - right branch in resection of bile duct tumors, Feb. 100-101
  - stenosis, Feb. 86
- Postcholecystectomy injuries (see Cholecystectomy, injuries)
- Pseudopolyp: of ulcerative colitis, May 278
- Pylorectomy, Dec. 770
- Pyloric gastric ulcer
  - barium study of type III, Dec. 778
  - channel, type III, Dec. 792
- Pyloroplasty: with vagotomy for gastric ulcer, Dec. 799-801
- Pylorus sparing gastrectomy: in gastric ulcer, Dec. 807-810

## **Q**

- Quality of life: after urinary diversion, July 460

## **R**

- Radiography
  - of biliary stricture, benign, Jan. 18-22
  - interpretation of, Jan. 22
- of biliary stricture, malignant, Feb. 81
- gastric ulcer
  - type I, Dec. 776
  - type II, Dec. 777
- Radiotherapy
  - of bile duct tumors, Feb. 112-115
  - brachyradiotherapy, Oct. 664
  - chemoradiotherapy and wound healing, Oct. 659-663
  - in lung cancer
    - non-small-cell (see Lung cancer, non-small-cell, radiotherapy)
    - small-cell, Nov. 738
  - for perianal inflammatory lesions in leukemia, Oct. 626
- Reconstruction: of biliary-enteric continuity in bile duct tumors, Feb. 94-97
- Rectum
  - cancer after ileoproctostomy for neoplastic polyposis, May 316
  - carcinoma (see Carcinoma, colorectal)
  - complications in chemotherapy of cancer, Oct. 624-627
  - hyperplasia, nodular lymphoid, May 279
  - polyps in Gardner's syndrome, May 297
- Resuscitation: after burns, June 347-349
- Retroperitoneal fibrosis, May 309
- Round ligament approach: to bile duct tumors, Feb. 109-112
- Rupture
  - of aorta, contained, Apr. 246, 248

of diaphragm, Apr. 252  
of tracheobronchial tree, Apr.  
239-241  
Rydygier, Ludwik, Dec. 770

## S

Sato, T., Dec. 808  
Sclerosing (see Cholangitis, sclerosing)  
Sepsis: suspected in chemotherapy, effect of catheter exchange on catheter removal in, Oct. 655  
Septic thrombophlebitis: and skin infections, Oct. 657-659  
Shotgun blast with small bowel injury, Apr. 257 of torso, Apr. 228  
Shunt in carotid endarterectomy, avoidance in difficult neck, Aug. 520-521 late development of EEG changes necessitating, Aug. 522 malfunctioning, EEG changes reflecting, Aug. 521-522  
Shunting: peritoneovenous, in malignant ascites, and metastases, Mar. 190  
Sigmoid conduit diversion, July 419-424 bowel preparation in, July 419-420 operative technique, July 420-424 sigmoid segment isolation, July 421 stoma creation for, July 424  
Skin infections in diabetes, Sept. 556-559 septic thrombophlebitis and, Oct. 657-659 in urinary diversion, July 407  
Soft tissue infections: in diabetes, Sept. 556-559  
Spleen: injuries of, Apr. 250-251  
Splenoportography: in stenosis of portal vein, Feb. 86  
Stenosis: of portal vein, Feb. 86

Stoma construction with protruding "nipple," July 417 for ileal conduit diversion, preparation of, July 415-418 in ileal loop diversion, correct placement, July 410 loop ileocutaneous, Turnbull's method for, July 416 for sigmoid conduit diversion, July 424  
Stomach (see Gastric, Gastrointestinal)  
Subclavian artery: false aneurysm of, Apr. 245

## T

Tension pneumothorax, Apr. 234-236  
Thermal injury (see Burns)  
Thigh: desmoid tumors of, May 309  
Thrombophlebitis: septic, and skin infections, Oct. 657-659  
Tibial exostosis: in Gardner's syndrome, May 311  
Toe: big, ulcer of, Sept. 578  
Tomography, computed of cholangiocarcinoma, Jan. 11 of kidney injury, Apr. 260 of liver in intraparenchymal injury, Apr. 253 of lung contusion, Apr. 241, 242 of pancreas, showing large cavity near head, Oct. 629  
Torso coronal zones, Apr. 217 sagittal zones, Apr. 216 shotgun blast of, Apr. 228 trauma; Apr. 215-265 approaches to, general, Apr. 222-227 in motor vehicle accidents, incidence, Apr. 220 penetrating injuries, Apr. 219 relation of distance fallen to velocity at impact, Apr. 221  
Toxicity pancreatic, in chemotherapy of cancer, Oct. 627-629

Toxicity (*cont.*)

- renal, after chemotherapy of cancer, Oct. 646-647
- Tracheobronchial tree: rupture, Apr. 239-241
- Tracheostomy, Apr. 232
- Transplantation (*see* Diabetes mellitus, transplantation)
- Trauma
  - abdominal, causing biliary injury, Jan. 54-55
  - of genitalia, Apr. 258-259
  - torso (*see* Torso, trauma)
- T-tube: end-to-end anastomosis over, for biliary duct injury, Jan. 30
- Tumors
  - bile duct (*see* Bile duct tumors)
  - bony, and polyposis, May 310-312
  - cell(s)
    - heterogeneity, and chemotherapy, Mar. 160-163
    - human, metastatic propensity (in nude mice), Mar. 173-175
    - metastatic behavior of, Mar. 174-175
    - metastatic propensity in nude mice, Mar. 173-174
  - desmoid
    - of thigh, May 309
    - treatment, May 322-324
  - doubling time, Mar. 186-187
  - fibrous, in Gardner's syndrome, May 309
  - heterogenous populations, instability of, Mar. 154-156
  - nude mouse as recipient for, Mar. 171-173
  - organ microenvironment in development of (in rat), Mar. 167-168
  - Pancoast (*see* Pancoast tumors)
  - soft tissue, and polyposis, May 307-310
- Turcot's syndrome, May 296-303
- Turnbull's method: for loop ileocolic stoma, July 416
- Typhlitis: complicating chemotherapy of cancer, Oct. 632-633

U

Ulcer

- after adriamycin infiltration, Oct. 658
- of big toe, Sept. 578
- of Cruveilhier, Dec. 769
- duodenal, and benign biliary stricture, Jan. 56
- gastric (*see* Gastric ulcer)
- of heel, neuropathic, Sept. 569
- mal perforans, and diabetes, Sept. 567
- Ulcerative colitis: pseudopolyp of, May 278
- Ultrasound
  - of cholangiocarcinoma, hilar, Feb. 82
  - Doppler, in cerebral blood flow measurement, Aug. 499-500
- Ureterococutaneous ileostomy, July 433-438
- Ureterocolonic anastomosis, July 423
- Ureteroileal anastomosis, July 414
- Ureteroileal diversion (*see* Ileal reservoir)
- Ureterointestinal diversion: complications of, July 425-431
- Ureterojejunal cutaneous diversion, July 418-419
- Ureterosigmoid anastomosis: submucosal tunnels for, July 422
- Ureterosigmoidostomy, July 431-432
- Urinary diversion, July 407-471
  - colon for, transverse, July 424-425
  - continent, July 431
  - cutaneous, July 407
  - future direction, July 460-464
  - ileocecal, July 424, 426-427
  - quality of life after, July 460
  - ureteroileal (*see* Ileal reservoir)
  - ureterointestinal, complications, July 425-431
  - ureterojejunal cutaneous, July 418-419
- Urinary tract
  - infections in diabetes, Sept. 561-562
  - injuries, Apr. 259-260

## V

- Vagotomy, Dec. 774
  - with drainage for gastric ulcer, Dec. 801
  - gastric (*see* Gastric vagotomy)
  - with gastric resection, distal, Dec. 791-799
  - parietal cell, Dec. 803
  - truncal, with pyloroplasty for gastric ulcer, Dec. 799-801

## Vein

- access for chemotherapy (*see* Chemotherapy of cancer, venous access)
- central (*see* Central venous catheter)
- portal (*see* Portal vein)

Ventilatory function, Apr. 234

## Vessels

- access for hemodialysis in diabetes, Sept. 554-555

- anatomy in cerebral blood flow, function and ischemic injury, Aug. 485-486
- cerebral, disease in diabetes, Sept. 553-554
- complications in diabetes, Sept. 546-555
- great, injuries to, Apr. 244-247
- injuries, Apr. 263-264
- peripheral, disease complicating diabetes, Sept. 547-552

## W

- Weight "apparent," of organs in violent impact, Apr. 220
- Wound healing: and chemoradiotherapy, Oct. 659-663
- Wounding agents: to torso, Apr. 217-222
